

RESUME BOOK

INTERNSHIP CANDIDATES

MATHEMATICS IN FINANCE

Master of Science Program

DEAR Colleague,

We are pleased to share with you the resumes of the graduate students in NYU Courant's *M.S. in Mathematics in Finance* who are looking for summer internships.

We believe our students are the most astute, most capable, and best trained group of students of any program. The resumes you find in this resume book describe their distinguished backgrounds. For the past years we have one of the highest placement records for internships and full-time positions. Our students enter into front office roles such as trading, portfolio or risk management, on the buy and the sell side. Their computing, quantitative modeling, and machine learning skills, as well as their hands-on practical experience, makes them productive from day one.

Our graduate-level curriculum is dynamic and challenging. For example, the first semester investment course does not end with CAPM and APT, but is a serious data- driven course that examines the statistical principles and practical pitfalls of covariance matrix estimation and portfolio construction. As part of our core curriculum, students learn the modern tools of computer science, machine learning and data science as they are used in the financial industry today. Our advanced electives cover cutting-edge topics in alternative data, algorithmic trading, computational statistics, derivatives pricing, financial machine learning, risk and portfolio management, and XVA. Our instructors are senior industry professionals and full-time faculty from NYU Courant, the top ranked department worldwide in applied mathematics. You can find more information about our curriculum and faculty at **math-finance.cims.nyu.edu**.

Sincerely yours,

Petter Kolm DIRECTOR Jonathan Goodman CHAIR Leif Anderson

New York University Courant Institute of Mathematical Sciences MS in Mathematics in Finance 251 Mercer Street New York, NY 10012-1185 Phone: (212) 998-3104 | Fax: (212) 995-4195

THE CURRICULUM HAS FOUR MAIN COMPONENTS

For more information about the program curriculum and course descriptions, visit **math-finance.cims.nyu.edu/academics.**

01. FINANCIAL THEORY, STATISTICS, AND FINANCIAL DATA SCIENCE

These courses form the core of the program, covering topics ranging from equilibrium theory, Black-Scholes, Heath-Jarrow- Morton, linear regressions, covariance matrix estimation to modern machine learning techniques and how they are used in quantitative finance.

02. PRACTICAL FINANCIAL APPLICATIONS

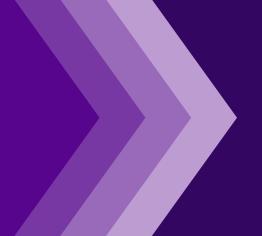

These classes are taught by industry specialists from prominent Wall Street firms. They emphasize the practical aspects of quantitative finance, drawing on the instructor's subject matter experience and expertise.

03. MATHEMATICAL TOOLS

This component provides appropriate mathematical background in areas like stochastic calculus and partial differential equations.

04. COMPUTATIONAL SKILLS

These classes provide students with a broad range of software skills in Java and Python, and facility with computational methods such as optimization, Monte Carlo simulation, EM-type algorithms and the numerical solution of partial differential equations.

PRACTICAL TRAINING

In addition to coursework, the program emphasizes practical experience. All students do a capstone project (the Project and Presentation course), mentored by finance professionals. Most full-time students do internships during the summer between their second and third semesters.

OUR CURRICULUM

	1ST SEMESTER	2ND SEMESTER	3RD SEMESTER
FINANCIAL THEORY, STATISTICS, AND FINANCIAL DATA SCIENCE PRACTICAL FINANCIAL APPLICATIONS	Financial Securities and Markets Risk and Portfolio Management Data Science and Data- Driven Modeling	Dynamic Asset Pricing Machine Learning & Computational Statistics Market Microstructure Advanced Topics In Equity Derivatives Interest Rate & Fx Models Active Portfolio Management	Advanced Statistical Inference and Machine Learning Trends in Financial Data Science Time Series Analysis & Stat. Arbitrage Alternative Data in Quantitative Finance Fixed Income Derivatives: Models & Strategies In Practice
		Modeling and Risk Management of Bonds and Securitized Products Trading Energy Derivatives Algorithmic Trading & Quantitative Strategies Advanced Risk Management	Practice Trends In Sell-Side Modeling: XVA, Capital and Credit Derivatives Cryptocurrency and Blockchains: Mathematics and Technologies Project & Presentation
MATHEMATICAL TOOLS	Stochastic Calculus		
COMPUTATIONAL SKILLS	Computing in Finance Data Science and Data- Driven Modeling	Scientific Computing in Finance	

For more information about the program curriculum and course descriptions, visit <u>math-finance.cims.nyu.edu/academics.</u>

KAILAI CHEN

EDUCATION

Expected 12/24 NEW YORK UNIVERSITY New York, NY The Courant Institute of Mathematical Sciences M.S. in Mathematics in Finance • Coursework: Stochastic calculus, Black-Scholes, Fama-French, algorithmic trading and quantitative strategies, risk & portfolio management, statistical arbitrage, Hull-White model, penalized regression, decision trees, data science, cryptocurrency and blockchains 09/18 - 06/22 **UNIVERSITY OF LEEDS** Leeds, UK **B.S. in Computer Science** • *Coursework:* calculus, linear algebra, probability, procedural programming, machine learning, object oriented programming, artificial intelligence, data mining, algorithms and data structures, software engineering, parallel computation, combinatorial optimization • Honors/Awards: Second-Class Honors, Upper Division EXPERIENCE 09/22 - 12/22 WORLDOUANT BRAIN **Global Alphathon 2022 (Quant Competition)** • Attained Gold level in WorldQuant Challenge • Ranked in top 5% for Stage 1, and won 3rd place in US for Stage 2 • Identified 20 high-quality alphas, with Sharpe over 1.25 (3 of these alphas were higher than 4); turnover was within 70% 09/20 - 12/20 CHINESE ACADEMY OF SCIENCES Beijing, China **Institute of Computing Technology Machine Learning Algorithms Researcher Intern** Analyzed online transaction data through machine learning algorithms to research consumer behavior and preferences of different user groups • Processed 500k+ sets of original online transaction data through ETL and PCA • Used K-means algorithm to cluster data; visualized data set • Published paper 'On a Machine Learning Based Analysis of Online Transaction' for 2022 3rd International Conference on Machine Learning and Computer Application

PROJECTS

01/20 - 03/20 FUDAN UNIVERSITY

Face Recognition Based on Deep Learning and Pattern Recognition

- Used Python to achieve PCA algorithm and LBP feature algorithm
- Combined Haar-like feature extraction algorithm and Adaboost to train feature classifier •
- Built convolutional neural network and trained face recognition model; improved accuracy of face recognition from 78% to 86%

UNIVERSITY OF LEEDS 02/22 - 05/22

Convolutional Neural Network Model for Video Analytics in Edge Computing

- Detected images in which background had changed, using Edge AutoTuner framework
- Used VIRAT Video Dataset and chose 10 videos from as datasets and trained them using model
- Modified structures and parameters of edge model by changing neural network
- Optimized algorithms by adjusting structure of neural networks; added residual networks to compensate for errors

COMPUTATIONAL SKILLS / OTHER

Programming Languages: Python, Java Interest: Texas Hold'em Poker (semi-professional) Languages: English (fluent), Mandarin (native)

Shanghai, China

Leeds, UK

QUANQUAN CHEN

(201) 626-0959 // <u>q.chen@nyu.edu</u> // <u>linkedin.com/in/Quanquan-Chen</u>

EDUCATION

Expected 12/24 NEW YORK UNIVERSITY

The Courant Institute of Mathematical Sciences

M.S. in Mathematics in Finance

- *Coursework:* Brownian motion, Ito's lemma, Black-Scholes model, Feynman-Kac formula, programming in finance(Python), linear Regression, supervised and unsupervised learning, risk management, financial asset trading, statistical inference for models, trading simulations
- *Expected Coursework:* object-oriented programming(Python), machine learning, data structures and algorithms, arbitrage pricing, fixed-income models, foreign exchange derivatives markets, interpolation with optimization methods, portfolio management, incomplete markets

09/19 - 06/23 ZHEJIANG UNIVERSITY

B.S. in Mathematics and Applied Mathematics

- *Coursework*: mathematical modeling, combinatorial optimization, interpolated theory, parameter estimation, hypothesis tests, Bayesian statistics, calculus, linear algebra, real analysis, ordinary differential equations, law of large numbers, Newton method, corporate finance
- *Honors/Awards:* Outstanding Graduate, 2nd Prize of Chinese Mathematics Competitions(CMC) of College Students, 1st-Year Students' Scholarship, 3rd-Year Students' Scholarship, Academic Excellence Award, Outstanding Community Service Award

EXPERIENCE

06/22 - 11/22 SHENWAN HONGYUAN SECURITIES RESEARCH CO., LTD.

(One of China's largest comprehensive securities research & consulting institutions) Shanghai, China Analyst Assistant / Intern, Department of Financial Engineering (Python)

- Collected product data (e.g., trading volume, trading expenses, total cost, investment income) on nearly 300 fund of funds by web crawling in Python; provided data for follow-up research
- Based on China's market, explored fund managers' timing ability with regression model, and discussed differences of conclusions between markets of China and US
- Extracted and anatomized low-cost fund data; summarized competitive advantages and background, as well as business strategies of investment companies; produced client report
- Collaborated with colleagues to analyze 10 case studies of regular dividend funds (e.g., in US, Japan) on features, purposes, and target groups to derive insights for Chinese funds
- Investigated several pieces of information related to mutual recognition of funds; summarized its development, features, and difficulties
- Obtained and examined data about 10 overseas pension FOFs; summarized their features and advantages; produced client report

PROJECT

03/23 - 06/23 ZHEJIANG UNIVERSITY

Hangzhou, China

- Thesis: Extreme Value Distribution of Censored Samples and Its Applications (Python)
 Researched adaptive type-II progressive hybrid censored data (combination of type-I and type-II censored data, which exists widely in medical experiments)
 - Estimated parameter using two methods, each with two loss functions: single-layer Bayesian estimation and E-Bayesian estimation, with square error and linear exponential loss functions
 - Conducted simulation study to assess and compare accuracy of 4 estimations, and applied them to real data
 - Made large improvement (with nearly 10⁴ in mean-square error) in accuracy of Weibull distribution's parameter estimation of adaptive type-II progressive hybrid censored data

COMPUTATIONAL SKILLS / OTHER

Programming Languages and Software: Python(Pandas, Numpy, Scipy, Matplotlib), MATLAB, LaTeX, SQL, Linux *Languages:* English (fluent), Mandarin (native)

New York, NY

Hangzhou, China

EDUCATION

Expected 12/24	NEW YORK UNIVERSITY The Courant Institute of Mathematical Sciences M.S. in Mathematics in Finance	New York, NY
	 Coursework: stochastic calculus, option pricing and hedging, machine learning and portfolio management, market microstructure, algorithmic trading, convex optimiza 	
09/18 - 06/22	 NANJING UNIVERSITY B.S. in Financial Engineering <i>Coursework:</i> Black-Scholes model, option volatility, OOP, machine learning, data s <i>Honors:</i> National Scholarship (top 3%), Outstanding Student at Nanjing University 	
01/21 - 05/21	UNIVERSITY OF CALIFORNIA, BERKELEY Exchange Program	Berkeley, CA
EXPERIENCE		
07/22 - 06/23 11/21 - 03/22	 LINGJUN INVESTMENT (Top 4 hedge fund in China, \$10B AUM) Exchange-Traded Option, Quantitative Researcher Intern Constructed 60+ temporal alpha factors of vol and spot at minute level into pool, ar them into Cython; achieved 0.6- correlation and 1.5+ Sharpe ratio in and out of sam Picked features from alpha pool; built combos with random forest, XGBoost to creating signals; achieved 3+ SR, 20%+ AAR, 1- turnover rate, 7%- max drawdown (2015 - Developed arbitrage and regression strategies to achieve 2+ profit/loss and 0.7+ with connected OSIM system to KSIM system to develop OTC strategies Cleaned static and dynamic data and provided APIs to PM to calculate required information in the P&L attribution, automating reports and calculating reference of Structured Finance, Quantitative Researcher Intern Designed and calculated prices and Greeks of 10+ OTC options on ETF with BS ar Completed dynamic delta hedging of options to analyze different volatility risk preference of the structure of the prices and structure of the prices and provides of the prices of the	nple ate vol position · 2023) nning rate; ormation isk ratio hanghai, China ad MC
05/21 - 08/21	SHENWAN HONGYUAN SECURITIES	hanghai, China %+ accuracy
PROJECTS		
08/21 - 10/21	 NANJING UNIVERSITY Research on Backtesting System Improved system to compute and visualize backtesting statistics (e.g., IC, IR, NAV) long and short backtesting; completed 10+ operators to process alpha factors Collaborated on basic framework of automatic mining alpha factors based on genet 	

11/19 - 04/20 **Research on Terrorist Financing**

- Collected and preprocessed Bitcoin address and transaction data to generate 20+ features
- Predicted terrorist financing, with 70%+ accuracy; in linear models and tree models

COMPUTATIONAL SKILLS / OTHER

Programming Languages: Python (pandas, numpy, scipy, scikit-learn, pytorch), Cython, C++, MATLAB, Linux *Certifications:* C++ for Financial Engineering (QuantNet), with distinction; Deep Learning Specialization (Coursera) *Interests:* Basketball (Nanjing University Business School Championship)

SICHEN (FRODO) GU

(347) 449-4983 // sichen.gu@nyu.edu // linkedin.com/in/sichen-gu/

EDUCATION

Expected 12/24	NEW YORK UNIVERSITY New York, NY The Courant Institute of Mathematical Sciences
	 M.S. in Mathematics in Finance <i>Expected Coursework:</i> risk management, Fama-French, algorithmic trading, Black-Scholes model, VaR, covariance matrix estimation, Monte Carlo simulation, stochastic process
09/19 - 05/23	NEW YORK UNIVERSITY New York, NY The Courant Institute of Mathematical Sciences B.A. in Mathematics and Economics, Minor in Computer Science • Coursework: linear regression, derivatives pricing, machine learning, real analysis, statistics, econometrics, ordinary differential equations, macroeconomic analysis, optimization • Honors/Awards: Mathematical Association of America Problem of the Month Winners Circle, Dean's List (all academic years), NYU Founders Day Award, NYU CAS/GSAS Scholarship
EXPERIENCE	
06/23 - 08/23	CHUANG YUAN FUTURES Shanghai, China Investment Research Intern (Python)
	 Analyzed and processed diverse dataset comprising 127 monthly variables and 1 quarterly variable (GDP) from FRED-MD / FRED-QD dataset Executed data transformation, including variable standardization and outlier removal, to ensure variable stationarity Leveraged dynamic factor models on nowcasting model to produce accurate forecasts and nowcasts of economic variables Executed data reporting hyperbolic participation of critical economic indicators
	 Enabled proactive decision-making by providing early estimates of critical economic indicators Initiated research on hierarchical risk parity (HRP) model, including in-depth analysis of academic papers and facilitation of plans for HRP's future implementation at firm
05/22 - 08/22	 ASTOR REALTY CAPITAL New York, NY Private Equity Intern Conducted quantitative and qualitative due diligence for potential investments by computing net operating income, yield on cost, and waterfall structure profits Leveraged financial modeling techniques like discounted cash flow (DCF) analysis and proforma modeling to assess projected cash flows and evaluate investment scenarios
PROJECTS	
10/23 - 12/23	 NYU COURANT New York, NY Comparative Analysis of Correlation Dynamics in Major Financial Markets (Python) Analyzed correlations among equity indices, currency pairs, and interest rates using EWMA and GARCH models, examining market trends and VIX's role in forecasting volatility Evaluated asset distribution patterns of S&P 500 and other indices by calculating rolling statistics (variance, skew, kurtosis); studied asset returns against Gaussian and alternative distributions Compared implied and realized distributions in financial indices; employed butterfly and kernel regression methods to analyze volatility smiles and assess statistical measures of volatility trends
03/23 - 05/23	 Quantifying Musical Evolution and Revolution (Python) Developed cosine similarity and eigenvector centrality model for dataset containing 50K musicians, enabling evaluation of genre similarity and relative popularity Employed PCA within k-means clustering and conducted multi-class classifications of music

Employed PCA within k-means clustering and conducted multi-class classifications of music genres using algorithms such as random forest, AdaBoost, decision trees, and neural networks
 Achieved AUC of 0.92 in predicting music genres from their features.

• Achieved AUC of 0.92 in predicting music genres from their features

COMPUTATIONAL SKILLS / OTHER

Programming Languages: Python (Numpy, Pandas, Scikit-learn, PyTorch), Java, R programming, MySQL **Interests:** highest amateur rank in Go (chess game), Travel (251 cities in 32 countries) **Activities:** Teaching Assistant, Grader, and Peer Mentor for undergraduate math majors at NYU Courant

SHENGJUN (JAMES) GUAN

EDUCATION

Expected 12/24	 NEW YORK UNIVERSITY New York The Courant Institute of Mathematical Sciences M.S. in Mathematics in Finance <i>Expected Coursework:</i> OOP (Java, Python), machine learning, Black-Scholes Model, stocha volatility model, local volatility model, time series analysis, fixed-income model 	
09/18 - 05/23	 ROSE-HULMAN INSTITUTE OF TECHNOLOGY B.S. in Mathematics and Data Science (Double Major) <i>Coursework:</i> stochastic and deterministic models in operating research, Baye applied linear regression, data mining, deep learning, machine learning, nume <i>Honors/Awards:</i> Dean's list 9 quarters, cum laude, Henry Turner Eddy Award Mathematics for 2 students out of class of 2023 	erical method
PROJECTS		
09/22 - 05/23	 ROSE-HULMAN INSTITUTE OF TECHNOLOGY Math Senior Thesis Research: Stochastic Model and Option Pricing (Python) Conducted literature reviews on stochastic volatility models and parameter es methodologies including extended Kalman filter Experimented with Double-Heston model with stochastic interest rate compor closed-form pricing formula for European option to extend model flexibility i Solved pricing equations under stochastic models with implicit finite schemes Implemented rolling-window BSM model trading strategy within VectorBT (I on FRCB stock, which resulted in more than 50% return in long-only position 	nent to derive n theory s Python) framework
06/22 - 08/22	 Rose-Hulman Summer Research Fellowship (R, Python) Reviewed literature on power of one-sample permutation, bootstrap tests, and student's t-test Boosted simulation speed on GPU by 100 times and rendered interactive data visualization from results in R to compare power of statistical tests across sample sizes 	
12/22 - 02/23	 NoSQL Database for Trading System (Python) Led 3-member team to engineer database that stored asset information, stock data, and company news data using Mongo, Neo4j, and InfluxDB Developed queue system using Kafka between Alpaca API and database systems 	
1/21 - 02/21	 Machine Learning on SPY500 (Python) Used time-series modeling, KNN, random forests, PCA on SPY500 and VIX data to predict binary one-day return, with 56% accuracy Infused risk management signals generated by VaR and ES models with ML for prediction 	
06/21 - 09/21	 Certificate in Quantitative (CQF) Finance Program Projects (Python) Solved Black-Scholes equation using partial differential equation and Martingale approaches Developed and backtested trading strategy using signals from random forest and trees 	
01/21 -02/21	 Coffee Controller System Software Design and Implementation (Java) Led 4-member team to design and implement coffee controller system that invorder management platform, coffee controller processing, and data layers Incorporated factory, observer, and decorator software design patterns 	volved business

COMPUTATIONAL SKILLS / OTHER

	The Courant Institute of Mathematical Sciences	
	M.S. in Mathematics in Finance	fante Carla simulation
	• <i>Coursework:</i> stochastic calculus, machine learning, Black-Scholes, M CAPM, data-driven models	Ionte Carlo simulation,
09/19 - 05/23	RUTGERS UNIVERSITY	New Brunswick, NJ
	 B.S. in Physics and minor in Mathematics and Computer Science <i>Coursework:</i> quantum algorithms, linear algebra, ordinary differentia processes, computer programming, probability theory, linear regression <i>Honors/Awards:</i> Paul Robeson Thesis Scholar, awarded High Honors <i>Thesis:</i> "Mitigation of Noise in Quantum Computations for Solving the second sec	on s in the Physics major
EXPERIENCE		
09/21 - 12/21	RUTGERS UNIVERSITY	New Brunswick, NJ
	School of Arts and Sciences	
	Learning Assistant, Analytical Physics 2	
	 Conducted research on communicating multiple topics clearly and com Collaborated with several sections of undergraduate students to developed 	
	 Conaborated with several sections of undergraduate students to devera knowledge of problem solving and technical skills 	op men conceptuar
09/21 - 12/21	RUTGERS UNIVERSITY	New Brunswick, NJ
	School of Arts and Sciences	
	 Learning Assistant, Analytical Physics Lab Facilitated undergraduate student groups, improving their data modeli Collaborated with multiple student groups, enhancing their problem s 	
04/22 - 08/23	RUTGERS UNIVERSITY	New Brunswick, NJ
	School of Arts and Sciences	·····, ···, ···,
	Research Assistant (Python)	
	• Used linear regression analysis to reduce errors in technical/quantum	computations, result:
	20-fold improvement in computationDemonstrated 99% mitigation of errors on IBM quantum computers	
	 Demonstrated 99% initigation of circles on 1DM quantum computers Learned Python libraries quickly (e.g., created ancilla qubit reuse cod 	e using IBM Oiskit)
	• Took initiative to create error mitigation techniques in quantum comp	
	• Authored senior thesis and presented key results to faculty board; awa	arded High Honors
PROJECTS		
05/23 - Present	BASKETBALL PLAYOFFS SIMULATION (Python)	Remote
	• Constructed algorithm in Python that takes in large set of parameters a simulation that predicts NBA playoffs winner	
06/16 - 08/16	MASTERS IN THE UNITED STATES (Java)	Remote
	• Led and collaborated with 2 other programmers on Android application	on that helps non-US

 Led and collaborated with 2 other programmers on Android application that helps non-US students interested in pursuing US academic degrees

PROJECTS

09/22 - 06/23 XI'AN JIAOTONG-LIVERPOOL UNIVERSITY

- Kou's Jump Diffusion Model for Option Pricing (MATLAB) • Derived pricing formula step by step and verified leptokurtic feature of returns • Performed parameter estimation to calibrate Black-Scholes' and Kou's models against real-world data of options on S&P 500 via fixing time to maturity and fixing option contract Reduced prediction errors by 50.3%, on average, under Kou's model when fixing option contract • XI'AN JIAOTONG-LIVERPOOL UNIVERSITY 04/21 - 09/21 Subsurface Flow Simulation via Machine Learning (Python) • Implemented physics-informed neural network (PINN) to solve Laplacian equation with Dirichlet boundary conditions numerically
 - Investigated scenarios with regular blocks and irregular cracks, in which Laplacian coefficients were heterogeneous within computational domain

COMPUTATIONAL SKILLS / OTHER

Programming Languages: Python, MATLAB, SQL, Java *Languages:* English (fluent), Mandarin (native) Award: Meritorious Winner in Interdisciplinary Contest in Modeling in 2021 Suzhou, China

08/18 - 06/22	SOUTHEAST UNIVERSITY	Nanjing, China
	 B.Econ. in Financial Engineering <i>Coursework:</i> multivariable calculus, statistics and probability, stochastic proordinary and partial differential equations, Black-Scholes, database system, 	
EXPERIENCE		
07/22 - 11/22	KAFANG TECHNOLOGY	Shanghai, China
	(Top-tier Chinese high-frequency prop trading firm)	
	 Quantitative Research Intern – High Frequency Trading Constructed high-frequency factors based on volume and price data from lin 	mit order books
	improved 2- and 5-second price dynamic predictions by 1% more than XGE	
	• Created data processing tools that received and cleaned backtesting system'	
	exchange data; generated information about main contracts for all Chinese of	
09/21 - 01/22	CAUSIS INVESTMENT	Wuhan, China
	(Commodity-trading-advisor hedge fund with \$300M AUM) Quantitative Research Intern – Commodity Trading Advisor	
	 Developed new trend trading strategy with volume-price data from steel and contracts; backtested strategy, resulting in 45% annualized return and Sharp Have generated profit for portfolio, since January 2022, based on new trend Built minute-level strategy based on whole commodities market; backtesting ratio of 1.3 	e ratio of 2.1 I trading strategy
06/21 - 09/21	HUATAI SECURITIES	Shanghai, China
	 Quantitative Research Intern – Stock Trading Strategy Predicted log-return on CSI 300 Financials constituent stocks using generative adversarial networks (GAN) with over 70% direction prediction and low RMSE 	
	 Used Fama-MacBeth regression, PCA, and lasso to portfolio that mimicked 3 macro factors with major asset classes or Citic Industry Index constituent stocks 	
	• Replicated index performance; selected stocks with more than 0.8 correlation index return according to Citic High-Dividend Strategy Index compiling methods.	
PROJECTS		
	SOUTHEAST UNIVERSITY	Nanjing, China
01/22 - 11/22	 Valuation of Basket Options Under Stochastic Interest Rate and Volatility Sr Developed analytical formula for pricing basket options with stochastic intervolatility smile assumptions; results were consistent with those of Monte Ca 	nile erest rate and
11/21 - 06/22	 First Passage Time (FPT) and Its Application in Finance Deduced closed-form solution for FPT of one-dimension, time-homogeneou 	us diffusion process

 Built commodity strategy by modeling asset price dynamics via exponential O-U (Ornstein–Uhlenbeck) process; attained annualized return of 25% and Sharpe ratio of 1.0

	06/20 - 07/20	UNIVERSITY COLLEGE LONDON	London, UK
2nd Year Algebra / Number Theory / Combinatorics Projects (R)			
• Led team to compile and analyze reference materials based on Artin's primitive root conjecture			
• Applied equations and modeling graphs that team derived from conjectures to determine		• Applied equations and modeling graphs that team derived from conjecture	s to determine
		whether conclusion was true	
		whether conclusion was true	

COMPUTATIONAL SKILLS / OTHER

Programming Languages: Python, R, SPSS, SQL, C++ *Languages:* English (fluent), Mandarin (native), German (beginner)

ZEHAO YANG

(929) 302-9838 //zehao.yang@nyu.edu // linkedin.com/in/zehaoyang/

EDUCATION

Expected 12/24	NEW YORK UNIVERSITY The Courant Institute of Mathematical Sciences M.S. in Mathematics in Finance • <i>Expected Coursework:</i> penalized regression, decision tree, Fama-French mod	New York, NY lels, Feynman-Kac
09/18 - 09/22	formula, Black-Scholes, Hull-White models, Ornstein-Uhlenbeck, Monte Car WASEDA UNIVERSITY	lo method
09/18 - 09/22	 School of Political Science and Economics B.A. in Economics <i>Coursework:</i> linear algebra, calculus, real analysis, entrepreneurial finance, s <i>Honors:</i> Monbukagakusho Honors Scholarship for privately financed interna 	
08/21 - 05/22	PURDUE UNIVERSITY Study Abroad	West Lafayette, IN
	 <i>Coursework:</i> OOP (Java), ODE & PDE, Markov chain, probability, time serie <i>Honors:</i> Dean's List and Semester Honors both semesters 	es models
EXPERIENCE		
02/23 - 03/23	 <u>SHENZHEN CAPITAL GROUP CO. LTD.</u> (2nd largest venture capital company in China, with \$65B AUM) Data Scientist Intern (Python, SQL) Developed machine learning model using logistic regression with PCA to for 	Shenzhen, China recast corporate
	 financial fraud in publicly listed Chinese companies Applied lasso regression for industry-specific feature optimization in predict identifying key factors influencing corporate financial fraud Adjusted penalty coefficient C, based on industry characteristics; employed model's performance; achieved 0.92 	Ċ,
11/22 - 01/23	 BOSERA ASSET MANAGEMENT CO. LTD. (3rd largest asset management company in China, with more than \$200B AUM) Quantitative Research Intern (Python, R, MATLAB) Developed average true range (ATR) trading strategies for Chinese stock inder ineffectiveness of ATR strategy Backtested ATR strategy across various asset classes, achieving annual return 37.44% for 50 types of commodity futures (e.g., steel, soybean, and gasoline) Identified limitations of ATR strategy by confirming low annual returns, of 9. when applied to specific stock index futures (e.g., CSI300) 	s of 28.12% to
PROJECT		
09/23 - 12/23	 NEW YORK UNIVERSITY Hedge Fund Performance Forecasting Analysis Applied penalized regression to hedge fund returns on Fama-French Factor 3 Implemented elastic net regularization to enhance OLS performance; calcul Dynamic Options Hedging Strategy Based on BlackScholes Model Created dynamic options hedging strategy based on Black-Scholes with S&P 	ated its MSEs

• Analyzed hedging errors for options portfolios to optimize hedging strategies; developed statistical visualizations, including histograms, to depict hedging error distribution

COMPUTATIONAL SKILLS / OTHER

Programming Languages: C++ (STL, boost), Java, Python (pandas, numpy, matplotlib, scikit-learn, PyTorch), R, SQL Languages: English (fluent), Japanese (fluent), Mandarin (native), Cantonese (conversational) QuantNet Certifications: C++ Programming for Financial Engineering; An Intuition-Based Options Primer for Financial Engineering (with Distinction) Activities: Math Finance Recitation Leader at NYU Courant

EDUCATION

Expected 12/24	 NEW YORK UNIVERSITY The Courant Institute of Mathematical Sciences M.S. in Mathematics in Finance <i>Coursework:</i> stochastic calculus, securities and derivatives, risk and portfol 	New York, NY
	dynamic asset pricing, machine learning, data-driven modeling, convex op	-
01/20 - 05/23	 NEW YORK UNIVERSITY B.A. in Mathematics and Economics (Double Major), Minor in Computer S <i>Coursework:</i> differential equations, probability, statistics, econometrics, fit <i>Honors/Awards:</i> Honors Degree, Magna Cum Laude, Dean's List every se <i>Thesis:</i> An Empirical Study from the Perspective of Buy-side Credit Ratin 	nancial economics
EXPERIENCE		
07/23 - 09/23	 CHINA SECURITIES FICC Intern Assistant – Fixed Income Department Multi-Assets Group (R) Formulated stock indices / Treasury futures strategy based on relative risk momentum indicators; achieved 26.5% backtested return and 1.28 Sharper Developed interest rate / exchange rate correlation model using various TT employed linear mapping approach for trend visualization and under/overv Constructed automated TD indicators warning system on FX securities with 	premium and ratio 'M windows; 'aluation heat map
06/23 - 07/23	CHINA GALAXY SECURITIESECredit Derivatives Intern Assistant – Fixed Income Department (Python)• Developed quantitative sector rotation trading strategy with crowdedness in• Designed and implemented chips indicator on major Chinese stock indices• Reproduced time-series-cross-section double momentum market timing str• Collaborated on derivative trading arrangements; contributed to critical inv	ategy
06/22 - 09/22	 UBS SDIC FUND MANAGEMENT Credit Analyst Intern – Fixed Income Department Developed quantitative credit rating model for airport industry using mach incorporating multiple factors of company and external supports, targeting Evaluated 2 published companies' credit; wrote full initial credit rating representiannual reports for 88 transferable bonds, and independently wrote brit 	CBR implied ratings orts; updated
09/21 - 06/22	 ORBITS VENTURE Analyst Intern – Option CTA and Equity Research Researched general market trends and reported updates to S&P 500 option Performed bottom-up fundamental analysis and valuation of Qualcomm, R equities; presented stock pitches, with ZIM selected into portfolio; generated 	ivian and ZIM's
PROJECTS		
03/23 - 05/23 11/22 - 12/22	 NEW YORK UNIVERSITY The Courant Institute of Mathematical Sciences Trading Strategy Back Test System (Python) Led team of 7 in developing backtesting system for stock trading strategies Deviced system requirements, tracked project progress, and solved develop Interest Rate and Stock Index Exotic European Option Pricing (Python) Designed Monte Carlo pricing model for option (LIBOR and Nikkei225 as 	oment issues s underlying assets)
	Calibrated volatility for two-factor model and discounted with riskless nun	neraire to get price

COMPUTATIONAL SKILLS / OTHER

MENG YUAN

(551) 359-0254 // meng.yuan@nyu.edu // linkedin.com/in/yuanm

EDUCATION

Expected 12/24	NEW YORK UNIVERSITY The Courant Institute of Mathematical Sciences M.S. in Mathematics in Finance	New York, NY
	• <i>Forthcoming Coursework:</i> stochastic calculus, algorithmic trading, data-drive statistical inference, derivatives pricing	en modeling,
09/18 - 06/22	 SICHUAN UNIVERSITY B.Econ. in Financial Engineering <i>Coursework:</i> time series analysis, financial stochastic processes, machine lear data structure and algorithms in C++, database system, numerical methods, economic structure and algorithms in C++, database system, numerical methods, economic structure and algorithms in C++. 	
EXPERIENCE		
09/21 - 01/22	 SHANGHAI KAFANG INFORMATION TECHNOLOGY Quantitative Research Intern Constructed high-frequency CTA signals (e.g., step order imbalance ratio and using fundamental analysis, technical analysis and deep learning models like C Developed high-frequency CTA market-making strategies based on LGBM, in high-frequency signals with low-frequency signals Backtested strategies on 50+ types of commodity futures and obtained annuali 30% with max drawdown < 5%, winning ratio of 70% and Sharpe ratio of nea Calculated fill rate of algorithmic trading orders and futures' price receiving to optimize strategies 	CNN and LSTM accorporating zed return over rly 3
07/21 - 08/21	 SHENYIN & WANGUO FUTURES Quantitative Research Intern Chengdu, C Calculated delay of every second between local and exchange servers with linear regression model Predicted probability of stock prices declining from surged limit with technical analysis and machine learning models (e.g., neural networks, decision trees), achieving 80% accuracy Constructed timing strategy by predicting half-month stock returns based on decision trees, wannualized alpha return reaching 20% and max drawdown of 10% in bear markets 	
PROJECTS		
10/21 - 02/23	 SICHUAN UNIVERSITY Enhanced Index Tracking Based on Kernel Search Modeled enhanced index tracking as mixed integer linear programming (MILI solved it by applying heuristic kernel search, using YALMIP tool Improved kernel search algorithm by dividing time span into multiple periods, out-of-sample RMSE from 1.5 to 0.3, according to backtests on China's CSI 3 	reducing
10/20 - 09/21	 SICHUAN UNIVERSITY Portfolio Management Based on Random Matrix Theory Filtered covariance matrix of portfolio returns with random matrix theory Calculated minimal risk portfolio and efficient frontier in Markowitz's theory covariance matrix, reducing out-sample risk by 2/3 on China's CSI 300 index 	Chengdu, China using filtered

EDUCATION

Expected 12/24	NEW YORK UNIVERSITY The Courant Institute of Mathematical Sciences M.S. in Mathematics in Finance	New York, NY
	• <i>Expected Coursework:</i> time series analysis, alternative data, fixed inc. Implicit Risk-Factor Model, EM algorithm, Hidden Markov Models (H	
09/19 - 05/23	 NEW YORK UNIVERSITY The Courant Institute of Mathematical Sciences B.A. Honors in Mathematics, Minor in Computer Science Undergraduate Coursework: probability, bayesian statistics, SVD, PC numerical methods, linear & non-linear optimization, regression, ensert Graduate Coursework: portfolio theory, Ito's Lemma, Black-Scholes, Carlo, PDE implicit scheme, local volatility, VaR, Feature Map Regrest Honors/Awards: Dean's List (2019-2023), Magna Cum Laude, Phi Berl 	mbling, clustering, CNN Hull-White model, Monte ssion, AdaBoost
PROJECTS		
	NYU COURANT	New York, NY
01/23 - 05/23	 Analysis of Portfolio Allocation Schemes (Python) Analyzed CAPM theory, mean-variance optimization, APT model and and summarized findings in report Adopted and implemented Attilio Meucci's mean-variance optimization proposed in his book <i>Risk and Portfolio Allocation</i> Applied APT model that generated views for latent factors and used the variance of return via Bayesian scheme Backtested and compared performance of different MVO and Black-L schemes using 10 years' weekly data; derived insightful findings 	on (MVO) framework nat to predict mean and
01/22 - 05/22	 Pricing an Exotic Option Using Hull-White Model (Python) Developed an object-oriented programming (OOP) framework for effi web-scraping, incorporating data such as Nikkei-225 index and US Tru- Calibrated Hull-White model parameters using cubic splines to determ dynamics for essential calibration Generated final price approximation for Quanto Option using Monte-O 	easury yield curve nine key values and
09/22 - 12/22	 Prediction of a 4-Fingered Robot Hand Given RGB+Depth Images (Pyt) Designed and implemented convolutional neural network (CNN) mode positions from RGBD images, achieving an RMSE error of less than (Explored various neural network structures and fine-tuned hyperparam to construct an optimized model 	h on) el to predict finger).00414
01/23 - 05/23	 Image Recovering and Line Fitting With Different Machine Learning T Evaluated performance of random forest, gradient boosting, and featur amplified data or regularization using 5-fold grid search cross-validation. Compared performance of exponential and B-spline feature maps on re- polynomial and periodic datasets 	re map regressors with on
01/23 - 05/23	 LSA-based Recommender (Python) Implemented prediction model for generating top-5 closest tweets to a tfidf_vectorizer and TruncatedSVD, as well as nltk package for lemma
